Creating a new Artist

Artists · https://mister-mixmania.com/en/support/creating-a-new-artist/

Available for: Artist Light, Pro, Premium, and Agency News & Artists.

Under the menu item **"Artists" → "Add New"**, the Artist editor opens where a new Artist profile can be created.

As a first step, you should fill in the following:

1. Give the artist a name.
2. Enter a bio / description of the artist (the more detailed and compelling, the better — see the article "Artist Profile: Description & Bio Tips" for guidance).
3. Set a featured image (a high-resolution photo of the artist, max. 1 MB, max. 2048 px on the longest side).
4. Select one or more Music Genres.

Artist options

Depending on your subscription plan, the "Artist" tab offers additional fields, including:

- Artist playlist
- Artist location
- Website URL

Choosing a design

Several design variants are available for the public display of your artist profile. All of them show the same data but differ visually — feel free to try out which one fits your music best.

Once everything is filled in, the artist profile can be **saved as a draft** or **published**.
